Problem Solving, Team
Collaboration

SUMMARY

Front-End Developer skilled in HTML, CSS, JavaScript, React and TypeScript, with strong experience building responsive, component-based web applications and integration APIs. Proven ability to translate Figma designs into clean, maintainable and user-friendly interfaces. Open to remote and collaborative opportunities.

PROJECTS & EXPERIENCE

FRONT-END MENTOR PROJECTS | 2020 - PRESENT

Built multiple production-ready UI projects including landing pages, multi-step forms, calculators, card layouts and API-powered applications.

Delivered pixel-perfect implementations based on Figma designs using HTML, CSS/SCSS, JavaScript and React.

Developed fully responsive layouts for mobile, tablet and desktop with attention to accessibility and clean code practices.

Integrated external APIs (e.g. Advice Generator) to handle dynamic data and real-world functionality.

PERSONAL PROJECTS | 2021 - PRESENT

Designed and developed a personal portfolio website showcasing selected projects, reusable components, animations and responsive layouts.

Implemented clean component structures and interactive UI elements using JavaScript and React.

Documented projects decisions and problem-solving approaches to demonstrate development workflow and reasoning.

VORTEX HORIZON WEB AGENCY | FOUNDER AND FRONT-END DEVELOPER | 2022 - PRESENT

Founded and built a mini web studio focused on custom websites and 3D model showcases.

Developed the complete front-end architecture, brand identity, interactive portfolio sections, project galleries and service pages.

Created reusable UI components, smooth navigation flows and client preview features for project demonstration.
